Mimosa Dahlia Gardens

1941-42

Seymour and Ellerslie Roads, Waterloo Green - - WYNBERG, Cape

“Dahlia” Brand Tuber Fertilizer

THE IDEAL DAHLIA FERTILIZER

This fertilizer is becoming increasingly popular as its merits are being better appreciated. This is a complete fertilizer that contains sufficient potash to ensure quality of bloom and good tuber formation. Its high Phosphate content results in Robust Growth, Sturdy Stems and an excellent yield of first class blooms.

Nitrogen is present in three forms:— Ammonium, organic and bone compounds.

Each form tends to act at a different period of disintegration and this tends to give a balanced supply best suited to the requirements of the Dahlia.

WELL SUITED FOR GENERAL GARDEN USE.

PRICES: f.o.r. Wynberg Station

To Our Customers and Friends.

In presenting this catalogue of beautiful plants we wish to dedicate it to all flower lovers; but especially to those who have tasted of the joys of Dahlia cultivation.

To those who have grown Dahlias before we offer a wider selection of varieties both new and old, all of which bear our recommendation. To those who have not entered this field of the flower garden we offer the many useful hints as to Dahlia cultivation and, should you be a novice as regards types and varieties, you may well leave the selection of names to our good and experienced care. We invite all to share our large and carefully selected collections both of Dahlias and other plants listed herein.

We feel confident that many have shared with us the joys that flowers never fail to bring when they are grown in order to alleviate the stress of these times. Gardens are indispensable to the mental poise of civilised beings and those who have them and use them for purposes of rejuvenation, testify to this. Dahlias never fail to enrich the beauty of even the smallest garden plot and they yield large dividends.

In spite of prevailing conditions we have been able to add a number of the latest varieties to our list and we are pleased that we have been able to include a further number of the older varieties that we had temporarily removed from our catalogues. Owing to efficient propagation we have been able to maintain the usual high standard of quality that goes with our name and we have very large stocks this season.

We always endeavour to give the utmost satisfaction to our customers and our policy has been well rewarded.

We appreciate the many letters telling of customers' success with our goods and we are always pleased to hear of the results obtained from our bulbs and plants after they leave our care.

Should anyone be disappointed, for one reason or another, we are always willing to share with such a one the benefits of our years of experience.

We wish to thank all customers for the excellent support that they gave us during the past season and we feel confident that that support will characterise this coming season as well.

Many messages of appreciation of cut flowers and floral pieces have reached us and such manifestations of pleasure are of great encouragement to us. We always endeavour to put the best that we have into our bunches of cut flowers and to tax our artistic ability to the utmost in the creation of our floral pieces.

We invite all to share with us the fertility of these gardens, our experience, and the wonderful plants and flowers that have been developed in the four corners of the Globe that we seek to increase and perpetuate for your benefit.

ORDER EARLY.

Stocks of some varieties are limited, therefore, to avoid disappointment, please place orders early.

OUR GUARANTEE.

We endeavour to send out all varieties true to name; however, should mistakes occur we will gladly rectify these on receipt of a bloom of miss-named variety, either in *Green Plants*, the same season, or in *Tubers* the next. Our aim is to give *every satisfaction*.

All tubers are sprouted before despatch in order to reduce the number of failures to a minimum. We pack the tubers so that they travel perfectly by **Agricultural Post**.

Customers are warned to look out for cut worms destroying the shoots just under the soil and thereby rendering the tubers blind.

Terms:

Any complaints or claims in regard to the quality of goods must be made immediately on receipt of same, or such complaints or claims cannot be entertained. As we cannot be held responsible for weather conditions, we therefore can give no warranty, implied or expressed, and will not be held responsible in any way for planting and forcing

of bulbs, or roots supplied, or failures owing to conditions beyond our control.

Orders from new or unknown clients must be accompanied by a Bank or other suitable reference, otherwise cash with order, or C.O.D.

Tubers will be fit for delivery as soon as sprouted, during September and October. Plants or rooted cuttings will be ready from November 15th onwards. Dry pot

tubers are available from early August for the benefit of customers wishing to plant earlier.

Packing and Postage at Cost, viz. :—

TUBERS: 2 dozen, 1/6; 1 dozen, 1/0; ½-dozen, 9d.

This includes packing and postage costs within the Union of South Africa only, other areas according to postage rates.

Successful Dahlia Culture.

The dahlia is a most accomodating subject, thriving on any soil, provided it has been deeply dug, heavily manured, and *well-drained*.

SOIL TREATMENT AND TIME OF WORKING:—

Heavy and Medium Soils.—As a general rule, heavy and medium soils are best dug over during late autumn or early winter. Dig about two spits deep and be careful never to work soil when in a wet condition. Allow to lie fallow during winter so that the open and rough surfaces can be acted upon by the elements. Dig heavy soils with narrow spits, which keeps them more open.

Light Sandy Soils.—Contrary to the advice given for the working of medium and heavy soils, light soils are best prepared during early spring. The deeper they can be dug, naturally the longer will they retain moisture.

It is best to allow a green crop of some kind, such as oats or rye, sown in autumn, or even weeds, to remain on the ground during winter. This will prevent the soil from being washed or blown away, as is often the case during heavy rain and wind storms. The green crop may be dug in two weeks before planting. It will add organic matter and supply the humus which is so necessary for binding light soils. If soil is poor, a dressing of stable or fowl manure may be spread to cover the weeds or rye crop.

Drainage.—Thorough drainage is one of the primary factors in growing dahlias successfully. Sandy soils are well taken care of in this respect, but heavy, clayey soils should have a quantity of coarse coal ashes dug into and mixed with the subsoil. Manure, straw or any stable litter thoroughly incorporated with the top soil, and a good dressing of coarse sand may also be added to clayey soils.

Liming.—Dahlias will thrive in a fairly acid soil. Lime should only be used every three years; it is seldom that soils have an insufficient quantity of lime for growing dahlias successfully. It is essential for new soils dug for the first time, or for soils rich in organic matter, but it is not to be recommended for soils in a high state of fertility or cultivation. Three ounces of slaked lime or one pound of agricultural lime per square yard should suffice.

Spacing and Manuring.—Holes into which to plant the dahlias may be dug during early spring, spacing them 3½ to 4 ft. apart for tall growers; 2½ to 3 ft. for medium growers; 2 to 2½ ft. for the Mignon and Pompom varieties. Holes should be 2 ft. deep and 2 ft. wide, and should be completed two to four weeks before planting. Mix a good foot of old manure with the bottom spit of soil and fill in with soil which has been thoroughly mixed with 8-16 ozs. "DAHLIA" Brand Tuber Fertilizer. For Mignon dahlias broadcast 8 ozs. per sq. yard of bed.

SITUATION:—The ideal situation for the dahlia is an open sunny one sheltered from wind, enjoying full morning sun, shaded from noon to 3 o'clock, and again afternoon sun until sunset. *Never* plant near hedges or under or near large trees: the roots of hedges and trees will keep the soil impoverished and too dry for any dahlia to succeed.

The correct situation has more to do with success in dahlia growing than many people realise. If our "ideal" situation cannot be given, rather give full sun, but if possible, shelter from wind.

CULTIVATION:—Constant cultivation cannot be over-rated: it is one of the chief essentials in all gardening operations. It means everything with dahlias, especially during a dry season. No matter how thoroughly your soil has been prepared or how suitable your situation may be, if thorough and systematic cultivation is neglected, the best tubers or plants will prove a failure. Soil around plants should be kept finely pulverised by means of hoeing; *never* allow to become hard and baked; always hoe after rain as soon as soil is dry enough to work.

In the early part of the growing season up to the time that plants produce buds, soil may be hoed to a depth of 2 to 3 inches, but after this, it should only be stirred to a depth of one inch, as the feeding roots will by this time have spread over a wide area near the surface, and deeper cultivation will injure them to the detriment of plant and blooms.

Hoeing should be done at least once a week: by this means weeds will be held in check as well as a soil mulch produced which will help to conserve moisture, and allow the air to penetrate the soil.

WATERING:—Dahlias are water-lovers and require plenty of water for their successful culture. While plants are small, the soil requires to be kept just moist, but as they grow they will need more and more water, until plants in full bloom will need a bucketful per day; that is, in dry sandy soils, in heavy soils, two to three waterings per

week will be sufficient. Automatic overhead watering, of course, is ideal, but as few gardens have this facility, foliage should be well hosed at least twice a week, which will help to keep the foliage healthy and clean.

PLANTING TUBERS:—

Plant tubers in the middle of holes, 6 inches deep in light soils, and 4 inches in heavy soils. Place tubers flat on their sides, with the growing eyes pointing upwards. Cover at first with only 2 inches of soil, filling in as the plant grows. Holes should be completed two to four weeks before planting.

PLANTING GREEN PLANTS:—

After removing moss and paper from plants, plant them with the top of the ball of soil about four to six inches deep. Cover with two inches of soil, and as the plant grows, fill in gradually. Place the ball of soil surrounding roots into water until soaked just before planting, and plant during late afternoon. Water thoroughly and protect for a few days by placing a couple of twigs with leaves on them around the plants.

It is advisable to place a paper or cardboard collar around the stem, extending from half an inch below the soil to one inch above, to protect plants from damage by cutworms.

DISBUDDING:—For cut flower, disbudding is absolutely necessary, in order to attain the desired long stem and large bloom. In fact, **all** plants are the better for disbudding as it lengthens the blooming period of the plant. As with the sweet pea, the more the blooms are cut the more will the plants produce. Remove all buds as soon as they can be handled, leaving only the large terminal bud, and allow an 18 inch stem at least. **Never** allow blooms to fade on plants.

STAKING:—All plants should be staked, for they are very brittle, breaking easily under the least provocation. It is a good plan to plant the stakes at the same time that tubers or plants are planted, growths can then be tied

to them as they grow. Stakes should be planted first, driven well into the soil, and crowns of tubers placed about 2 ins. from stakes.

TREATMENT OF CUT BLOOM:—Dahlia blooms can be made to last from three to four days when cut, provided they are treated properly. The blooms are best cut during the late afternoon, the ends of the stems plunged into a pot or jug containing about an inch of *boiling* water. Leave in for one or two minutes, after which place into a bucket filled with *cold* water and left outside overnight. They may then be arranged in vases the following morning. A few crystals of washing soda added to the water will help to make the blooms last, or a teaspoon of powdered alum added to a gallon of water. A tabloid of Asperin will be found to revive drooping blooms wonderfully.

FEEDING.—We have found the following top-dressing of the greatest assistance in keeping plants healthy and blooms large. Apply during late December and again during early February. Spread evenly to cover the surface of the soil around plants, about six inches from the stalks and rake in. The quantities given are sufficient for feeding a dozen plants.

6 Lbs. "DAHLIA" Brand Tuber Fertilizer reduce the amount in the case of dwarf and small-growing types. (This fertilizer is obtainable from us.)

DIGGING AND STORING TUBERS:—After frosts have blackened plants, or they have died down naturally, cut off stalks to about 12 inches from the ground. After a week carefully lift by means of a garden fork, tie labels securely to tubers, allow them to thoroughly dry in the sun, and then store in a frost-proof shed, placing on beds of dry sand. In frost-free areas they may be left outside with safety, under a pergola, or tree, or any convenient place.

In areas subjected to heavy frosts it is advisable to leave tubers in the ground during winter and cover with about a foot of dry grass or any litter. Lift when all risk of frost is past during early spring. divide and replant immediately: this method reduces losses to a minimum.

DIVIDING CLUMPS:—Place clumps in a warm sunny place during early spring, and cover with soil. Keep watered, and as soon as eyes appear, carefully divide, allowing an eye or shoot to a tuber. These eyes will be noticed around the stem or crown of the clump. A tuber without a piece of crown on which the eyes appear is useless. Never allow *more* than one tuber to an eye — usually the smaller the tuber, the better the plant. Large clumps should never be planted entire. Cut off the base of tuber before planting. Cover tubers with wet soil, after being cut, until planted.

PESTS:—Dahlias must be kept growing to produce the best results. Should you notice your plants apparently standing still or making no new growth, carefully examine the leaves on the underside, and you will most likely find that the plant has been attacked by Red Spider.

Red Spider is a small red insect which covers the under-surface of the leaves with a dusty web, which slightly resembles spider-web. If there are violet plants nearby, you will soon find where the pest comes from, as it is almost impossible to keep Red Spider off violets during dry weather. This pest attacks the underside of the leaves causing them to become yellow and dry. Spray the underside of leaves with Nicotine Extract as directed on tins.

Thrip is a little pest which attacks the fibres of the newly-formed leaves, causing them to grow malformed and curled, and retarding the growth of the plants, especially while they are still small. Thrip is a very small grey or brown insect and is rather difficult to detect, but many plants are stunted and prove a failure because of the ravages of a few of this pest. Spray as for Red Spider.

Cutworms.—See paragraph on "Green Plants".

Should you be troubled with any other pest, send full particulars to us and we will endeavour to suggest a remedy.

Try Our Green Plants !!

Note our style of packing, also the robust Green Plant with soil washed out of roots showing tubers already formed and a mass of strong roots.

Owing to the comparative bulk of Green Plants the postage and packing costs are more than the costs for Tubers.

The prices for Green plants are the same as for Tubers. The following are **Postage and Packing Costs** within the Union of South Africa only, other areas according to postage rates.

1/6 for six plants, 1/2 for four plants, and 10d. for two plants.

We have specialised in green plants for many years and know how to raise them, how to grow them, and how to pack them successfully in specially designed boxes, which

are made on our premises, to travel in safety to all parts of the Union and Southern Rhodesia. We guarantee our plants to be strong, healthy and well-rooted.

Green Plants should flower within six to eight weeks of planting!

Latest and Recent Decorative, Hybrid-Decorative; Cactus and Hybrid-Cactus Dahlias

Owing to the stock of some of the newest varieties being limited we are obliged to book orders for these **SUBJECT TO BEING UNSOLD.** *Priced individually.*

I.D.—Informal-Decorative.

D.—Decorative.

H.D.—Hybrid-Decorative.

C.—Cactus.

H.C.—Hybrid-Cactus.

Alhoa—H.C., very attractive medium-sized blooms are borne on stiff, wiry stems. The centre petals are fairly straight, whereas the older florets twist and curl to form an artistic bloom of a pleasant warm orange shade with a golden sheen, shading to yellow at the base of the petals. Medium height. **5/-**

Bim Bam—H.C., an excellent bloom composed of long, twisted florets of the true hybrid-cactus type. Medium-large blooms are carried on excellent stems. Plants are free-flowering. Colour is a welcome addition to the bronze shadings, being a dark ochre-yellow. 1938 American Honour Roll dahlia. Medium height. **7/6**

Bronze Champion—D., a very large decorative borne on excellent stems. Blooms are composed of loose, wide petals golden yellow at base, shading to bronze or reddish brown at tips. These massive blooms present a most striking appearance. Height $4\frac{1}{2}$ feet. (Green Plants only). **£1 1s.**

Cherokee Rose—I.D., an outstanding bloom composed of long, broad, tapering petals slightly twisted at the points, forming a flower of considerable depth. The glorious blooms are held to face upwards on rod-like stems. The colour is as outstanding as the shape, being a beautiful shade of lilac pink, shading to deep rose pink. Height 4 to 5 feet. **10/6**

Dr. Plumecocq—D., a large, formal decorative composed of numerous broad, slightly twisted, petals. Reminiscent of "Insulinde" type, though a fuller bloom, especially at the centre. The older petals twist almost back to the stiff, wiry stems, forming a deep bloom. Colour old gold at centre, shading to lighter gold at tips. Height 4 to 5 feet. **5/0**

Dr. Derrick Martin—I.D., a very large informal decorative carried erectly on long, rod-like stems. The colour is lemon yellow at centre shading lighter to tips of the long, slightly incurving petals. A flower that combines grace with size. Excellent habit and of medium to tall growth. **£1 1s.**

Freckles—D., very large, though most attractive; blooms are composed of broad, tapering petals and are carried with regal bearing well above the dark green foliage. The colour of these blooms is chrome-yellow striped and speckled red; but like many bi-colour varieties, the colouring varies and some plants bear striking, deep scarlet blooms striped and speckled yellow. Free-flowering and excellent plant habit. Medium height. **10/6**

Formality—D., very large though well-formed blooms are composed of a mass of broad, pointed petals exhibiting a slight twist at the points. Good habit and strong stems support the heavy heads. Colour has been described as crimson-scarlet at base lightening to flame colour. Medium height. **15/-**

Gladys Clark—H.D. Blooms of medium size are carried on good stems and are excellent for cutting. The exquisite colouring of the long and shapely petals attracts attention where grown. The colour is a bright, though rich, pink shading to yellow at centre of bloom. Medium height. **7/6**

Golden Goliath—D. Broad, tapering and slightly twisted petals form an immense bloom carried on excellent stems. The pure yellow colour is a welcome addition to the field of yellow dahlias. Dwarf habit. Excellent exhibition bloom. **£1 ls.**

G. Marconi—H.C., an Italian introduction worthy of merit. Large, artistic blooms are carried well above the foliage on long, strong stems. Excellent plant habit. The colour of these large blooms is a pleasant study in bronze shadings. Height 5 feet. **10/6**

Golden Triumphator—D., rich, deep golden-yellow blooms are composed of broad, well-formed petals. An outstanding colour and a large bloom, well-balanced and favouring the formal type; but it has its distinctive qualities. Medium height. **7/6**

Grand Marshall—H.C., an attractive flower carried on good stems. The beautiful form and outstanding colour of this variety at once attracts attention. The colour belongs to the mauve shadings and is described as a crimson-violet with lighter shadings on the reverse of the petals. A promising variety exhibiting vigorous growth. Height 5 feet. **10/6**

Jessie King—H.C., medium-large and most attractive flowers are borne on excellent stems. These beautiful blooms are composed of narrow, curved florets and the colour, which is a combination of lilac shades giving a rosy lilac effect, is most striking and at once commands attention. Excellent habit. Medium height. **7/6**

John Green—I.D., colour a brilliant fiery scarlet for greater part of petal, but changing towards base to deep yellow, which shows as a disc in striking contrast. Flowers of largest size with petals of medium width and good to the centre. Plants of strong, healthy growth. Height 5 feet. (*Raiser's description*). An excellent variety. **7/6**

Katie K.—I.D., a very large informal decorative, resembling "Kathleen Norris." The heavy blooms are carried well on strong stems. Colour described as "beautiful soft violet rose with lighter veinings." An ideal exhibition bloom. Height 4 to 5 feet. **£1 ls.**

Kemp's Golden Giant—D., very large blooms are composed of broad, well-formed petals that tend to curl backwards, thus lending artistic qualities to so large and formal a bloom. The golden-yellow blooms are true to name and carried on strong stems. Short habit of plant growth. **7/6**

Kemp's Ruffled Beauty—I.D., a free-flowering variety bearing medium-large, artistically-shaped blooms carried on good stems. A "Ruffled Beauty" that is a vivid orange shade, tipped salmon-orange, with a golden rosy centre. Plants are of medium height. **10/6**

Kentucky Dawn—I.D., shapely blooms composed of long, pointed petals held stiffly on strong stems. A giant decorative of the largest class. Colour described as "soft golden buff with light peach suffusion and reverse of rose with peach pencillings." **£1 ls.**

King Alfred—I.D., a large crimson scarlet decorative. The petals are long, twisted, and sometimes reflexed. Reverse of petals has a silvery appearance which adds distinction to the bloom as it is brought to the front, owing to the reflexing of the petals. Height 4 to 5 feet. **7/6**

Kingcup—H.C. Deep, clear yellow, blooms composed of medium width, curving petals are carried well on strong stems. A very good hybrid cactus suitable for both exhibition and cut-flower purposes. Medium height. (*Green Plants only*). 10/6

Lady Morton Smith—D. A seedling of "Daily Mail" that exhibits many of the excellent qualities of that variety. Blooms are large and of the same type as the parent; though the petals are somewhat broader. Colour described as a warm reddish shade, overlaid rosy tints and deeper at centre. Medium height. (*Green Plants only*). £1 ls.

Leyland Stanford—D., of this variety the introducer says: 'The best and brightest big red is our claim for this new introduction. Throughout the flower the colour is true, clear glistening bright red without shadings, and best of all, it does not fade in the least in very hot weather. Plant is of medium to tall growth, with strong stem stalks and good foliage.' 10/6

Limelight—H.C., a most beautiful hybrid cactus composed of long, pointed, generally incurving petals. Large blooms are carried well on strong stems. Good habit and a free bloomer. Colour described as soft sulphur yellow. Improvement on "Frau O'Bracht." Height 3 to 4 feet. 15/-

Miss Parkersburg—H.D., a medium to large bloom of attractive shape and colouring. The colour is a striking coppery-bronze shade with an orange to red shade on the reverse of the artistically-formed petals. The stems are excellent as is also the plant habit. Many awards gained by this variety in the U.S.A. Height 5 feet. 15/-

Monarch of the East—I.D., one of the largest informal decoratives. Huge blooms are carried well on sturdy stems. Colour described as "a light, yet rich, cadmium yellow, shading lighter and the reverse of coral red." Good habit. Excellent exhibition bloom. Height 4 to 5 feet. 10/6

Mrs. A. Fuller—I.D., one of the most beautiful Dahlias of large size yet produced. Long, tapering and slightly twisted petals form a bloom of exquisite shape carried on long, stiff stems. Colour yellow at centre of bloom, shading to terracotta tints, overlaid gold on the older petals. Outline of younger petals most exquisitely pencilled. Height 4 to 5 feet. 7/6

Mrs. F. E. Hill—D. The deep rosy-mauve blooms, composed of short, though shapely, petals, are borne on strong wiry stems. Plants are of low habit and are free blooming. 5/-

Marjery Rubery—C. A true garden cactus type composed of narrow curved petals forming graceful blooms carried well on long stems. Colour ivory yellow, shading almost to white at tips of petals. Plants medium to tall. Good habit. 15/-

Nagel's Giant—H.D., large and most attractive blooms are carried erectly on strong stems. The blooms are composed of numerous, tapering petals that tend to curl backwards, many of which exhibit a slight twist towards the gold-tipped point. The colour may be described as a combination of salmon and bronze tints. Medium height. 5/-

Nagel's Orange—H.C., a striking medium-sized Cactus bloom borne on excellent stems. The plant bears vivid orange blooms that are excellent for cutting. The inner florets are straight, but these give place to curved petals at the outer edge of the pretty blooms. Medium height. 7/6

Nightfall—C., a true cactus of a deep maroon shade that gives the appearance of an almost black dahlia. Long, curved and twisted florets form a most attractive and artistic bloom borne on fair stems. Height 4-5 feet. 7/6

Peer Cynt—H.C., one of the best in this class. The long petals are quaintly twisted, adding grace to this medium large bloom. Stems are long and of excellent quality. The colour is orange scarlet, shading to crimson-scarlet at the centre. Height 5 ft. 7/6

Prolific—C., a cactus bloom exhibiting excellent qualities, most suitable for cut flower and exhibition work. The numerous, long petals taper to a curved and twisted point forming a beautiful and attractive bloom. The plants are true to name and the plant habit is good. The colour is a bronzy yellow shade deepening to the full centre. Short to medium height. **3/6**

Rosemary—D., large formal decorative, carried on strong stems. Numerous pointed petals form a striking bloom of large size. Colour described as "a clear Phlox pink or lilac." Height 4 to 5 feet. **10/6**

Rudolf's Giant—D., a mammoth bloom almost as deep as it is broad. Petals wide and pointed. Colour apricot, overlaid gold, giving a very fine bronze effect. The heavy blooms are carried well on strong stems. Good flowering habit. Short growth but adequate stems. Height 3 to 4 feet. **10/6**

St. Bavo—F.D. A true pale pink seedling of "Jersey Beauty," exhibiting the same habits as its parent. The artistically rounded blooms are borne on superb stems. The plant habit is clean and blooming is profuse. A cut bloom comparable to the best. Medium to tall height. **7/6**

Sally B—D. Mammoth blooms composed of broad petals are carried on excellent stems. The colour is a clear rosy pink. Dwarf habit of growth. An excellent bloom for exhibition. **7/6**

Saffron—D., a formal yellow decorative of medium large size. The symmetrical blooms are carried well on good stems. A good strong bright yellow. Height 4 to 5 feet. **5/0**

Sergeant—H.C., a large and outstanding hybrid cactus. The long revolute petals are quaintly pointed and form a distinctive bloom. The colour is very striking, being described as crimson-scarlet, with a rosy tinge. Height 4 to 5 feet. **5/-**

Sovereign—H.D. Large blooms composed of numerous pointed and twisted petals are carried well on long stems. These clear medium yellow blooms are both attractive and useful. Excellent habit. Medium height. **15/-**

Springtime—D. Most beautiful blooms of medium size at once attract and command the attention of all. The artistically formed petals are a delicate shade of pink toning to cream at the tips. The vigorous plants bear numbers of these blooms on excellent stems. Medium to tall. (*Green Plants only*). **£1 ls.**

Starfish—H.C., a real beauty (Quaintly twisted petals form a bloom of exquisite shape and proportion. Colour deep reddish gold at centre, shading to old gold towards the tips. A tinge of violet on the reverse side of the petals is apparent when the petals reflex. Stems excellent. Good habit. Height 4 to 4½ feet. **7/6**

Sunrays—I.D., a very large though shapely bloom. Colour described as "clear buff with apricot suffusion, with a rather distinct peach red on reverse of petals." Good stems. An excellent exhibition variety. Height 4 to 5 feet. **£1 ls.**

Vondel—H.C., one of the best cactus dahlias of the medium class yet produced. Perfect stems carry perfect blooms composed of florets somewhat straight at centre, giving place to older rolled florets at the outer edge. Perky and attractive blooms. Colour a salmon-bronze overlaid gold. Short to medium height. **5/-**

Xanthine—D., an immense yellow bloom deep and broad composed of medium, tapering petals. These large, rich, deep yellow blooms are carried on fine stems. An excellent variety for exhibition and an asset to any collection. Medium height. **10/6**

New and Recent Introductions of Decorative and Hybrid-Decorative Dahlias.

Owing to the stock of some of the newest varieties being limited we are obliged to book orders for these **SUBJECT TO BEING UNSOLD.**

D—Decorative.

H.D.—Hybrid Decorative.

Priced Individually.

Adirondack Sunset—H.D., blooms deep, full and shapely, composed of broad, slightly twisted, petals. Colour orange scarlet flecked gold. Reverse of petals gold, thus forming an excellent sunset effect. The medium large blooms are carried well on long stems. A striking variety. Height 4 to 5 feet. **5/0**

Angelo Rossi—D., a most artistic bloom of medium large size. The outer florets are slightly curled and twisted, thus lending grace to the large head. The colour is a pleasant combination of fine old gold with a slight salmon suffusion; stems good. Height 4 ft. **2/6**

Azura—D., this superb American introduction must be seen to be appreciated. The numerous petals are wide, long and pointed, with a slight curl, forming a massive yet perfectly graceful bloom of intense loveliness. Colour soft mauve pink. One of the largest Dahlias. Height 5 ft. **3/6**

Bing Crosby—D., a large shapely bloom composed of wide, pointed petals exhibiting a pleasing curl. The colour is a bright yellow striped with red, though the yellow predominates. Stems good. Height 4 to 5 ft. **2/6**

Bosphorus—D., the numerous petals are exceptionally wide, tapering to a point with a slight curl, forming a monster bloom held gracefully erect on strong hard stems; colour a flaming orange-scarlet suffused gold. Height 5 ft. **2/6**

Buckeye King—D., blooms are formal in shape and are held erectly high above the foliage on strong stems; colour a rich amber deepening towards the high full centres of blooms. Height 5 ft. **2/6**

Secile Robinot—D., a medium decorative resembling "Jersey's Beauty", of a coppery-salmon-rose. The shapely blooms are carried on magnificent stems that need but slight disbudding. An excellent cut-flower. Height 5 feet. **2/6**

Crofton Black—Unique medium-sized blooms carried on long stems. Colour a combination of lemon at base and veined with orange, the whole overlaid with rosy tints. Tall. **2/6**

Chautauqua Sunset—D., petals are wide and pointed, forming a deep full bloom held to face squarely upwards on hard stiff stems. Colour a blending of rich old gold flushed old rose with mauve shadings. Height 3 to 4 ft. **2/6**

Clara Carder—D., an Australian introduction of proved worth. The blooms are very large; but they are graceful and shapely. The broad and curled petals are of a delicate cyclamen-rose shade suffused and bordered gold. The 10-12 in. blooms are borne on stiff, rod-like stems. A prolific bloomer. Height 4½ ft. **2/6**

Daily Mail—D., a 1930 giant of brilliant orange-yellow colouring; English introduction. The numerous petals are broad, curled, and pointed, forming a great monster bloom of perfect form, held rigidly erect on long, strong stems. Height 4½ ft. **2/6**

Eagle Rock Fantasy—H.D., a huge American of a light mallow-pink colouring. The long, broad petals taper to a point and are artistically notched, forming a graceful bloom of perfect form, carried erectly on strong stems. Height 4 to 5 feet. **2/6**

Flaming Sunset—D., broad, well-formed petals exhibiting a slight curl add distinction to this striking medium-large bloom. The colour is a velvety shade of orange-red. Flowers are borne on good stems. Height 4 to 5 ft.

3/6

Florette Flores—H.D., a striking bi-colour of medium size, composed of numerous well-balanced petals, cream towards the centre shading to crimson at the tips and around the edges. A good cut-flower carried on excellent stems. Height 4 to 5 ft.

3/6

Forest Fire—D., an appropriately named flower, being a combination of lemon-yellow suffused and shading to scarlet. The blooms are large and of artistic formation — most of the petals exhibiting a slight and pleasing curl resulting in an informal bloom of good proportions. An outstanding variety. Height 4 ft.

2/6

Frank Serpa—D., a large bloom composed of medium, pointed petals, many of which are slightly twisted, forming a graceful flower. Colour white at base of petals, shading to lavender rose at tips. Height 4 to 5 feet.

2/6

Freda George—D., a very large bloom of striking shape and colour. The wide petals taper almost to a point, many of which exhibit a slight curl. The blooms are both wide and deep, being borne erectly on splendid stems. The colour is a cream-rose suffused with a lilac sheen with a trace of gold towards the centre and base of the petals. Height 4 to 5 ft.

3/6

F. Riley—H.D., a large 1936 English dahlia of great beauty, being brilliant rosy-purple in colour, silver-tipped with a reverse of silver; stems long and erect. Height 4 ft.

2/6

Gladys Sandford—D., a deep, full bloom with a high centre and broad petals. The large, though artistic blooms, are borne well above the foliage on long, hard stems. The colour is a bright yellow shaded apricot with deeper shade on the reverse of the petals. Height 4 to 5 ft.

3/6

Grandee—D., a very large bloom composed of long, wide, petals, borne on strong stems. Colour a combination of Spanish-red and golden-yellow. Height 4 ft.

2/6

Heather—D., a medium decorative of undoubted prettiness, composed of medium petals, some of which are slightly twisted. Colour has been described as a "Rosy terracotta" and is very attractive indeed. Height 4 to 4½ feet.

2/6

Helly Boudewijn—D., a medium-large decorative of rare and excellent qualities. The compact blooms are composed of fairly broad florets, and is thus not too formal. The pure white blooms are borne on long, stiff stems. Height 4 to 5 ft. 1937 N.D.S. Gold Medallist.

2/6

Hi — Lite—D., a large, full bloom with a high centre. The wide petals taper to a most artistic bloom that is carried on long, strong stems. The colour is a velvety carmine shaded rosy-red and somewhat overlaid with gold. An outstanding variety. Height 4½ ft.

3/6

Himalaya—D., large shapely blooms composed of long, tapering and slightly twisted petals and are borne on strong, stiff stems. The colour is a pleasing combination of yellow, old gold and deeper bronze tints, with a trace of lilac on the reverse. Height 4 feet.

3/6

Hunt's Velvet Wonder—H.D., the numerous wide, long petals are curled and taper to a point, forming a giant bloom of exceptional depth and width, held upright on heavy, hard stems. Colour a rich, bright violet burgundy, and in some lights a true royal purple; very free flowering for so massive a bloom. Height 5 ft.

2/6

Jane Cowl—D. The deep massive blooms are composed of numerous twisted and curled petals of a glistening bronzy-buff and old gold colouring suffusing to a deeper shade at centre of bloom, reverse of petals a pale flesh colour. The exceptionally strong, hard, straight stems carry the giant blooms with perfect ease, gracefully erect. Height 4 to 5 ft.

2/6

Jersey's Beauty—D., this American variety is one of the best pink decorative dahlias we have ever grown. The blooms are medium-large and of perfect form, borne on long stiff, straight stems. The colour is salmon-rose suffused cheery. Height 5 to 6 ft. 2/-

Jimmie Foxx—H.D., a large bloom sometimes attaining a size of 13 in. by 8 in., borne on stiff, erect stems. The colour is a coppery-red tinged with henna. The flower is large and informal with long narrow florets — rather an unusual shape. Winner of several medals and blue ribbon awards. An outstanding dahlia and one that we can highly recommend. Height 4½ feet. 5/-

Kaweah—H.D., the great blooms are composed of wide, slightly-curved and pointed petals, held upright on hard, stiff stems. Colour difficult to describe, being a deep, clear rosy cerise; centre of petals shading to a rich velvety cardinal. Some American catalogues describe it as a rich fuchsia shade. Height 5 ft. 2/6

Kentucky—D., a true salmon-pink "Jersey's Beauty", suffused gold perfect stem and form. Height 5 to 6 ft. 2/6

Kentucky Red—D., one of the most brilliant American introductions, the colour being flaming scarlet which does not burn under the hottest sun. The large blooms are held to face upwards on long stems, and are of exceptional depth. Height 5 to 6 feet. 2/6

Kitty Mac—D., a large well-formed bloom carried on good stems. An attractive dahlia of a striking petunia-purple colour. Height 4 to 5 ft. 3/6

Koongarra Beauty—D., a large informal decorative bloom of excellent quality. The flowers are artistic in shape and attractive in colour, which may be described as a deep golden bronze with a lighter reflex. Stems excellent. Height 4 to 5 ft. 3/6

Major C. C. Messervy—H.D., one of the most striking pale yellow dahlias ever introduced; the wide, slightly curled and pointed petals form a massive bloom of intense beauty and perfect form, held to face squarely upwards on hard, stiff stems. Height 3½ ft. 2/6

Malibu Sunset—D., an outstanding variety. Blooms composed of long, broad petals twisted sufficiently to lend grace to so large a bloom. Colour a bright orange scarlet that at once attracts the eye. Excellent habit and strong stems. A variety that we can highly recommend. Height 4½ feet. 5/-

Margrace—D., large artistic blooms are carried on long wiry stem well above the foliage. The broad, slightly curled and twisted petals compose a bloom that is hard to beat in respect of shape and form. The colour is a vivid red with a golden sheen. Growth is clean and healthy, and the plants are exceptionally floriferous for so large a bloom. Height 4 to 5 ft. 5/-

Mary Elizabeth Redfern—D., the colour of this massive American dahlia must be seen to be appreciated; it is a rosy-mauve flushed lilac; most delicate; petals are wide, fairly long and slightly curled, forming deep, full blooms facing boldly upwards on strong stems. Height 4 to 5 feet. 2/6

Michael Steele—D., 1936 English introduction of a rich crimson colour throughout; petals broad at base but curling abruptly and pointed at tips: blooms are full and of great size and good stems. Height 5 ft. 2/0

Ministre Cassel—D., a new burgundy-red decorative of perfect form and large size; stems very wiry; petals wide and pointed. Height 4 to 5 feet. 3/6

Monmouth Sunburst—D., a "Roll of Honour" American dahlia well named; petals are long and wide, tapering to a point, forming a massive bloom held upright on strong stems; colour, citron-yellow flushed orange, producing a real sunburst effect. Height 4 to 5 feet. 2/6

Mother Maytrott—D., perhaps the most outstanding white dahlia yet produced. The blooms are large, deep and of perfect formation. The stems are long, wiry, and carry the blooms erectly. An American Home Achievement Medal Dahlia, 1936. Height 4 to 5 feet. 5/-

Mrs. George Le Boutillier—D., this massive American dahlia of a rich velvety carmine flushed-crimson colour will appeal to dahlia-fans; petals are wide and tapering to a point, forming deep blooms with high full centres held upright on strong stems; very free blooming for so large a flower. Height 4 to 5 ft. 2/6

Parade—D., a striking medium sized decorative borne on long rod-like stems. Colour gold, overlaid deeper bronze shades, tinting to lilac at the tips. An attractive and singular bloom. Height 4 to 5 feet. 3/6

Pierre Beaumont—H.D., one of the most shapely of the medium decoratives. The well-formed petals tend to curl back, resulting in an artistic, deep bloom. The colour is a golden bronze and the flowers are carried facing upwards on long, wiry stems. The plants are free-flowering. Height 5 ft. 2/-

Pink Daily Mail—D., this pure cyclamen-pink decorative is a sport from the famous "Daily Mail", which it resembles in every respect, except in colour, and is also of very large size. Height 4 to 5 ft. 2/6

Red Rover—D., Broad tapering petals form large shapely blooms of a crimson-scarlet colour. Perfect stems. Good habit. Medium height. 5/-

Salmon Queen—D., a large bloom of excellent quality carried on equally good stems. The petals are long and of medium width, forming a beautiful bloom of a striking salmon colouring. A variety that can be used either for purposes of exhibition or as a cut flower. Height 4 to 5 ft. 3/6

Sanhican's Bluebird—D., a most attractive bloom composed of broad, slightly twisted petals. The bluish mauve colour is perhaps the nearest approach to a blue dahlia. Medium height. 2/6

Shahrazad—D., a grand American decorative of large size, has been well-named a "Pink Jane Cowl." The great blooms are held erectly on strong, hard stems. Colour, clear rose-pink. Height 5 feet. 3/6

Sonny Boy—D., another monster American of outstanding beauty and colour, being a rich old rose slightly suffused and striped old gold; blooms are of exceptional depth as well as width, and face squarely upwards on hard stiff stems. Height 4 to 5 feet. 3/6

Stuart Ogg—D., an excellent dahlia in all respects, and a beautiful flower. Colour light lemon-yellow, but white showing at tips, and some petals curling and showing a white reverse. The flowers are large and quite reflexed in form, with florets long and of medium width. Flowers carried on strong, hard stems. Height 5 feet. (From raiser's description.) A variety that we can highly recommend. 5/-

Sunburst—H.D., the numerous petals are long and fluted with a twist and curl, forming a great perfect bloom of shaggy brilliance, held quite upright on rod-like stems; colour a glowing orange with a reverse of golden-lemon. It is a 1934 honour-roll dahlia. Height 4 to 5 ft. 2/6

Straight's White,—I.D., a very large and attractively-formed white dahlia. Long, somewhat narrow florets form a bloom of exquisite grace and beauty. One of the best white dahlias introduced as regards beauty of form. Won high American honours. Medium height. 3/6

The Commodore—D., a bright lemon-yellow American decorative of largest size. Petals long, wide and pointed. Form a deep, full bloom of exceptional beauty; one of the best yellow. Stems very erect. Height 4 to 5 feet. 2/0

Improved Commodore—D., the petals are slightly narrower and the blooms more compact than the original variety. A better bloom for cutting purposes. 2/0

Thomas A. Edison—D., a gorgeous, royal-purple American decorative. The magnificent, deep, full blooms are carried erectly on hard, strong stems; the numerous petals are of the staghorn formation. Height 4 ft. 2/6

Van Waveren's Red—Broad, pointed petals form a most striking bloom of medium size carried on excellent stems. Colour a bright crimson. A fine variety. Medium to tall. 5/-

Washington Giant—D., the wide, long petals twist and curl right back to the great hard stem, forming a bloom of exceptional depth and width held to face squarely upwards. Colour the most exquisite shade of lavender with orchid tints shaded with silver at the high full centres. Height 4 to 5 ft. 2/6

Wenoka—D., a large American of recent introduction; petals are wide and pointed, forming a deep, full bloom of a rich magenta-rose colouring flushed crimson at centre; stems perfectly erect. Height 4 to 5 ft. 2/6

New and Recent Introductions of Cactus and Hybrid Cactus Dahlias.

C.—Cactus.

H.C.—Hybrid Cactus.

Owing to the stock of some of the newest varieties being limited
UNSOLD.

we are obliged to book orders for these **SUBJECT TO BEING**
Priced individually.

Andreas Superba—H.C., the well-formed medium flowers are held erectly on long, stiff stems. Colour a vivid carmine-red. The prolific bushes provide excellent cut flowers for floral and table decorations. Height 4 to 5 ft. **2/6**

Better Times—C., the long, slightly curled petals form a large and striking bloom, excellent for both purposes of exhibition and cut flower. The colour is a clear violet-rose shading to lemon at the centre. Blooms well carried on excellent stems. Height 4 to 5 feet. **3/6**

Cherokee—H.C., a medium large bloom of exquisite shape and delicate colour. The pointed, slightly curled and twisted petals are of a delicate lavender flushed white. The younger petals are outlined in lavender which passes off to white towards the base and centre, resulting in a most artistic effect. Stems perfect. Height 5 feet. **3/6**

Chief Scout—C., a most beautiful cactus bloom composed of long, quilled and sometimes twisted petals. The colour is a vivid orange scarlet with a light reverse that shows towards the tips of the petals. These striking blooms are carried high above the foliage on long, stiff stems. Excellent habit. One of the best of the cactus type. Height 5 to 6 feet. **5/-**

Doris J. Cooper—C., a glorious cactus of medium-large size, of a bluish-lavender colour: one of the best ever introduced; the perfect blooms are held rigidly erect on exceptionally stiff stems. Height 5 ft. New Stock. **3/6**

Frans Berger—H.C., a 1934 Dutch introduction of great beauty, bloom medium-large, held erectly on long stems. Colour rich coral-red; petals curled and twisted. Height 5 ft. **2/6**

Golden Age—H.C., the long, quilled petals form a deep, full, large bloom of intense beauty and grace, held quite erectly on slender, stiff stems. Colour golden bronze. Height 5 to 6 ft. **2/6**

Inspiration—C., one of the most outstanding yellow cactus dahlias yet produced. The medium-large, deep yellow flowers are borne on stiff stems of excellent quality. The incurved, narrow florets betoken a true cactus. Height 4 to 5 ft. **3/6**

Lucky Bird—H.C., a large, deep yellow hybrid cactus composed of long, pointed petals. Blooms are large but not too heavy as the petals are mostly rolled or twisted. Stems wiry. A good exhibition variety. Height 4 to 5 feet. **3/6**

Mascotte—C., one of the most exquisite Cactus Dahlias yet introduced. The medium-sized blooms are composed of narrow, incurving and twisted petals forming not only attractive, but most useful flowers suitable for many types of decoration. The stems are long and of unimpeachable quality and the habit of growth is of the best. The colour is a pleasing and attractive shade of carmine-rose with a trace of yellow at the centre. Height 5-5½ feet. **5/-**

Miss Ohio—C., an excellent cactus of medium size composed of numerous long, narrow, slightly twisted and somewhat incurving petals. Colour described as a violet rose. Stems long and wiry. An excellent cut flower. Height 4 to 5 feet. **3/6**

Madame George Pernaut—C., a striking cactus composed of long, twisted, incurving petals, forming a most artistic bloom. Colour glowing scarlet with deeper shadings. Height 4 feet. 2/6

Moloch—H.C., a typical garden cactus, the flowers having florets broader at the base but pointed, which are produced with surprising freedom all through the season on dwarf-foliaged plants, with hard erect flower stems. Colour crimson-scarlet throughout. (Raiser's description.) Height 3 to 4 feet. 3/6

Mrs. Herbert O'Connor—H.C., a medium-large cactus dahlia of good shape and habit, borne on long stems. The colour is a soft rose-pink deepening slightly at the centre. Height 4 to 5 feet. 5/-

Nagel's Bijou—H.C., a beautiful cactus of medium size, having straight florets forming a very fine bloom. The stems are perfect. The colour is a soft salmon-rose with a flesh-coloured shade. The plants are very free-flowering. An excellent cut-flower. Height 4 to 5 ft. 2/6

Norel—H.C., 1936 Dutch introduction of intense brilliance and beauty; petals are fairly long and quilled, forming a medium large bloom of a vivid scarlet colour carried upright on slender wiry stems; a grand cut flower. Height 5 to 5 ft. 2/6

Oxford—C., a huge cactus, made up of a mass of petals, whorled and twisting. It flowers freely, considering its size, and on good stems. Colour rosy-purple throughout. (Raiser's description). Height 4 feet. 5/-

Pink Spiral—C., an exquisite new Cactus of perfect form and medium size, of a peach bloom pink in colour with a touch of primrose at the base of petals which are narrow and inclined to incurve, forming a shaggy bloom held quite erectly on slender stiff stems. Height 5 to 6 ft. 3/6

Richard Crooks—H.C., a glorious new addition to this popular class. Medium sized flowers composed of long, slightly twisted petals, forming a bloom of artistic shape and carried on long, stiff stems. Colour described as a brich red with a cardinal red sheen. Height 5 to 6 feet. 3/6

Scarlet Leader—H.C., a Dahlia true to name. It is indeed a leader in its class. A graceful hybrid cactus with artistically shaped petals. Colour is a glowing scarlet. Stems good. An excellent variety for cut work and an outstanding garden plant. Height 4 ft. 3/6

Schiller—C., a lovely amber-pink medium-sized cactus of 1930 German introduction. The perfectly-shaped blooms are carried erectly on long, wiry stems. One of the most beautiful cactus dahlias we have ever seen. Height 5 ft. 2/6

Van Waveren's Yellow—H.C. Long, mostly incurving petals form exquisite blooms carried well on long, wiry stems. One of the most outstanding yellow cactus varieties. Medium to tall. 5/-

Vlammenspiel—C., one of the most artistic cactus dahlias yet produced. The medium blooms have narrow, slightly incurved petals, and are borne on stems of excellent quality. The colour is an orange-red suffused vermillion with a trace of gold on the reverse of the petals. An excellent variety. Height 4 to 5 ft. 3/6

Yellow Colossal—H.C., large, beautiful blooms are carried on excellent stems. The petals are artistically curled and twisted, forming a bloom of attractive shape. The colour is a fine primrose-yellow and the plants have a good habit. Height 4 to 5 ft. 3/6

General List of Cactus and Hybrid Cactus Dahlias.

15/- per dozen.

C.—Cactus. H.C.—Hybrid Cactus.

Alois Nellen—H.C., a glowing 1934 Dutch introduction of medium size, held erectly on slender stiff stems; colour orange-scarlet flushed and tipped golden yellow; excellent for floral work. Height 4 to 5 ft.

Amsterdam 1932—C., medium Cactus of excellent form and stem. Narrow, incurving florets are those of a true cactus. Colour a reddish-brown shading to yellow. Height 5 ft.

Corillina—H.C., medium bloom of a coral-scarlet colouring flushed with violet and shading to gold at base of the long, wavy and twisted petals. Height 4 to 5 ft.

Fort Monmouth—H.C., a large American variety. The shaggy blooms are held erectly, the predominating colour being a rich wine-red with an undertone of crimson-maroon. Height 6 ft.

Frau Ida Mansfield — H.C., an outstanding deep yellow hybrid cactus of German introduction; the deep, full blooms of medium-large size are carried erectly on long, slender stems. Height 4 to 5 feet.

Paul Pfitzer—H.C., this champagne suffused yellow hybrid-cactus remains one of the most popular varieties. The dainty blooms are held very erectly on long, wiry stems. Height 4 to 5 ft.

Pola Negri—H.C., one of the best of the dark hybrid-cactus varieties. The medium-large blooms are composed of fluted florets of a deep mahogany, brownish-red colouring. Stems long and stiff, holding the shaggy blooms to point upwards. Height 5 to 6 ft.

Schlageter—H.C., a gorgeous, flaming-red bloom of medium size — stems erect. Height 5 ft.

Thomas Leavitt—H.C., an outstanding 1933 Dutch novelty; petals are fairly broad at the base tapering to a point curling and twisting, forming a large shaggy bloom both wide and deep of shimmering gold flushed salmon yellow; the great blooms are held erectly on strong, rigid stems. Height 5 ft.

Triumph of Paris—H.C., an orange-scarlet and yellow European introduction. Petals are short and quilled, forming a medium bloom held erectly on slender wiry stems; excellent cut flower. Height 5 ft.

White Wonder—H.C., a Hybrid Cactus with narrow petals that twist and curl, forming a large pure white bloom.

General List of Decorative and Hybrid-Decorative Dahlias.

15/- per dozen. OUR SELECTION 12/- per dozen.

—:o:—

D.—Decorative.

H.D.—Hybrid Decorative.

Heights 4 to 5 ft. except where stated.

American Sultana—D., scarlet blooms with gold-tinted heart and reverse of petals; strong stems. Height 5 ft.

Ballego's Glory—D., medium bloom of a deep mahogany-red tipped gold; excellent stems.

Betty Colter—H.D., large bloom of light salmon-red colour shading to old rose at base of petals; splendid stems.

Buckeye Bride—D., medium bronzy-pink blooms borne on strong stems.

California Idol—H.D., this giant American is outstanding in every respect, of great size, depth, and rod-like in stem; petals are exceptionally long, tapering to a point and slightly curled, forming a brilliant self-coloured yellow bloom of intense beauty. Height 4 feet.

Californian Rose—D., a giant American of rare beauty, being a clear bright rose in colour; the blooms, notwithstanding their great size, are extremely graceful and held upright on strong stems; petals are wide, long and slightly curled. Height 5 ft.

Champoeg—D., large blooms waxy-yellow at centre, shading to brilliant salmon; stiff stems.

Dixie Ravenscroft—H.D., an American introduction of large size; petals are long, tapering to a point with a twist and curl forming a superb bloom of a glowing orange colour flushed gold with a golden reflex; stems and blooms are perfection. Height 4 to 5 ft.

Dokoupilova Obrovská—D., a massive soft lilac decorative imported from Holland. The wide, long, wavy petals compose a deep, full bloom carried erectly on long stiff stems. Height 4 ft.

Dwight, W. Morrow—H.D., the brilliant rich colouring and pleasing shape of this red Dahlia attracts the eye.

Elite Glory—D. Large American decorative of a brilliant, rich, glowing red. The great blooms are carried quite erectly on strong stems.

Entrup's Monarch—D. The large, deep blooms are held quite erectly on long, strong stems. Colour a rich carmine-red. Height 4 to 5 feet.

F.T.D.—D., medium bloom. Colour tyrian rose; excellent stems.

Garth Harry—D., wide, curled petals forming a graceful bloom; colour dark red suffused lighter red; stems good.

Girl of Hillcrest—H.D., a golden orange American variety. Wide petals twist and curl; blooms are carried erectly on strong stems.

Golden Bronze—D., wide and pointed, forming a wide bloom, held upright on strong stems. Colour a rich golden bronze flushed orange on backs of petals. Height 5 ft.

Golden Sweepstake—D., a beautiful golden-yellow decorative of informal shape with slightly twisted petals, forming a bloom of pleasing depth borne fairly erectly on thin wiry stems. Height 3 to 4 ft.

Grace Curling—D., large, well-formed bloom borne on hard, slender stems. Pure white at base to half of florets, flushing to lilac-pink.

Hera—D., this variety is a robust grower bearing its fine blooms well above the foliage on stout stems. The colour is a striking rosy-mauve. Height 5 to 6 ft.

Huntingdon Beach—D., petals are long with a twist and curl, forming a large bloom, held upright on strong stems; colour a gorgeous orange-buff.

Insulinde—H.D., one of the most beautiful dahlias ever raised; golden-buff shaded bronze; the florets are twirled, making a lovely shape, and are shaded golden-rose on reverse; strong wiry stems.

Indiana Moon—H.D., the numerous curled petals form a shaggy bloom of rare beauty and most artistic form, the large blooms are held upright on strong stems, colour is flesh-ochre, flushed salmon-pink and gold.

Jean Trimbee—H.D., large, loose bloom of a rich dark violet colouring held on stiff stems.

Jersey's Beacon—D., one of the most spectacular American decoratives, being a brilliant Chinese scarlet with a buff reflex. Stems erect. Height 4 ft.

Jos. Janning—D., a 1935 European introduction. The long petals are slightly curled and form a monster bloom of a glorious carmine rose colouring slightly white tipped with reverse flushed white; stem quite erect. Height 4 to 5 ft.

Kathleen Norris—D., a striking American decorative of great size — a true rose-pink, deepening later to mallow pink; the broad overlapping petals are twisted at the ends, forming a gigantic bloom full to the centre.

Kemp's Violet Wonder—D., a beautiful American violet decorative. The large blooms are held upright on strong stems. Height 4 ft.

Lady Stonehaven—D., a large rich golden-yellow decorative of Australian origin; petals twist and curl forming a shaggy brilliant bloom held erectly on long, strong stems. Height 5 ft.

Maryland's Orange—D., a charming American decorative of medium size of an orange flushed red colouring. Stems stiff and hard.

Mastodon—H.D., a rich apricot English dahlia of large size and perfect stem; petals long and curled. Height 3 to 4 feet.

Monmouth Champion—D., large orange-scarlet bloom with petals wide at the base and pointed at the tips, with a twist and curl.

Monmouth General—H.D., large blooms borne on strong stems. Colour a brilliant henna darkening to a rich terra cotta.

Myra Howard—H.D., a glorious, wide-petalled American of a rich orange-bronze colouring. The full massive bloom is held erectly on hard stems. Height 5 to 6 ft.

New Glory—H.D., a rich dark violet American introduction with each petal white tipped, the medium-large blooms are held upright on long slender stems. A fine addition to the bi-colour class.

Orange Glow—D., broad, long florets form a medium-large bloom of pleasing shape and excellent habit. The stems are long and thin, but the flowers are carried erectly. The colour is an attractive shade of orange slightly suffused salmon, shading to yellow at the tips of the petals. A free bloomer. Height 5 ft.

Palo Alto—H.D., the great blooms are deep and full, composed of exceptionally long, wide, wavy petals of a salmon-bronze suffused gold colouring. Stems strong and rod-like, holding the blooms quite erectly. Height 5 feet.

Red Wonder—D., the flowers are composed of long, wide and pointed petals, with a slight curl and a full high centre. Stems erect and heavy. Height 5 ft.

Robert Treat—D., a large American decorative of great depth and beauty; colour similar to the American "Beauty Rose." Stems straight and stiff.

Royal Dutch—H.D., medium blooms of a deep rusty golden bronze colouring are held erectly on strong, hard stems.

Royal White—D., this glorious white decorative remains one of the most beautiful of the 1932 Dutch varieties. Height 5 to 6 ft.

Sanhican's Queen—D., one of the most beautiful of the famous "Sanhican" dahlias; colour a glowing apricot slightly carmine suffused. Stems erect.

Severings Triumph—D., a beautiful continental introduction of a rich salmon-pink colouring flushed gold with petals gold tipped which are wide and pointed, forming a large bloom held erectly on long hard stems. Height 5 ft.

Tecoma Beauty—D., medium-large bloom held on erect stems. Colour deep salmon-pink blended strawberry-pink shaded and tipped gold.

The Fireman—D., the blooms are held quite erectly on hard, cane-like stems. Colour brilliant cardinal-red, flushed gold at heart of bloom and gold tipped; profuse bloomer. Height 4 to 5 feet.

The World—D., this large American remains one of the most popular dahlias. Colour is best in autumn, being a rich, dark velvety red overlaid garnet, sometimes flushed silver with petals silver-tipped. Stems most erect.

Tommy Atkins — D., a brilliant scarlet decorative, aptly named. The medium-large graceful blooms are held stiffly erect on long, straight stems. Height 5 ft.

Trentonian—D., a large American decorative. Colour is a rich blending of old gold, amber and coppery bronze shades. Stems erect. Height 5 to 6 ft.

W. D. Cartwright—H.D., loose bloom, deep orange at centre, shading to orange-yellow at tips of twisted, curled and reflexed petals. Excellent stems.

White Abundance—D., beautiful creamy-white European introduction. The blooms are held upright on strong stems. Height 5 feet.

White King—H.D., a medium-large decorative of the whitest purity, borne on hard, cane-like stems. Height 4 ft.

White Duchess—D., an exquisitely beautiful Dutch Novelty of 1931 introduction. The numerous very broad florets are artistically curled and pointed, forming a monster bloom carried erectly on hard, stiff stems. Height 5 ft.

Miniature Pæony-Flowered, Decorative and Single Dahlias.

15/- per dozen. (Except where individually priced.)

M.D.—Miniature Decorative.

M.P.—Miniature Pæony-flowered.

S.—Single.

Height 2 to 3 feet usually.

Baby Royal—M.C., the most exquisite little bloom imaginable, carried erectly on a long slender stem. Colour flesh-pink on a yellow ground; inclined to go single.

Gordon King—M.D., 1936 English variety of a brilliant crimson-scarlet colour; the perfectly-formed little blooms are held erectly on stiff stems. 3/6

Little Darling—M.C., one of the most outstanding in this class. Colour rose with a yellow centre. A seedling of "Little Snow Queen." 3/6

Little Dream—M.C., an exquisite small cactus of a bright pink colour, the delicate petals being sometimes white-tipped; stems quite erect.

Little Jenny—M.C., this compact miniature cactus has tapering, slightly incurving petals, forming an exquisite bloom of a shell-pink colour, shading to yellow at centre. 3/6

Little Pearl—M.C., a charming salmon-pink flushed gold small Cactus; blooms and stems of perfection.

Little Snow Queen—M.C., a perfect miniature Cactus of whitest purity unequalled for floral work; the delicate blooms are held erectly on wiry stems.

Little Sunbeam—M.C., perhaps the prettiest miniature yet produced. The salmon orange blooms, yellow at centre, are borne on stiff stems in prolific abundance. 3/6

Marmot—M.P., loose, shapely flowers of a deep rose-flushed gold. The slightly twisted petals form an artistic bloom. Stems excellent.

Market Jewel—M.C., one of the best red miniatures yet produced. The star-shaped, velvety red flowers are borne clear of foliage on excellent stems. 2/6

Nectar—M.D., a pretty little yellow bloom composed of numerous straight little petals. Free-flowering and good habit. 3/6

Norah Bell—M.P. the brilliant small blooms are held upright on slender stems. Colour, scarlet-flame.

Ophelia—M.P. The perfect, dainty blooms are borne in profusion on stiff, slender stems. Colour yellow base suffused salmon, shading to rose at tips of petals.

Olympic Fire—M.P. The brilliant orange petals and dark red centre of these striking blooms are offset by very dark red foliage. A gem. Profuse bloomer. 3/6

Double Pompone or Bouquet Dahlias

10/- per dozen.

(Except where individually priced.)

The modern pompone is one of the most useful classes of dahlias; the exquisite little blooms which are borne on slender, wiry, long stems are the acme of beauty and grace as a cut flower for table and house decoration, and are unequalled for use in bouquet work. They are unsurpassed for brilliancy of effect where massed in colours in beds or borders. Height $2\frac{1}{2}$ to 3 ft.

Chamois Rose—champagne coloured; small.

Clarissa—small, pale primrose edged purple.

Cyril—a scarlet of fine form; small.

Deedee—beautiful lilac. Small. *Green plants only, 2/6 each.*

Fashion—medium; a bright orange.

Gretchen Heine—crimson and white; small.

Herbtzelose—large heliotrope dark centre.

Hildepuppe—very small raspberry red coloured pom.

Jhr. Van Cittert—yellow with orange tips; small.

Kokarde—beautiful golden orange; large.

Little Beeswing—a charming wee yellow edged scarlet pom.
1/0 each.

Nerissa—beautiful true pink; medium.

Orange Beauty—very small orange.

Mev. Boreel—medium in size; dark purple maroon, almost black.

Puppchen—small, clear sulphur yellow flowers.

Regulus—small flower of a purple shade. 1/0

Roschlein—small to medium flower of a bright rose colour.

Sonneroschen—small Pom with quilled petals. Beautiful golden-yellow tipped bronze. 1/0

Stoltze Von Berlin—large pom; beautiful rose.

Sunset—a rich orange; small.

Zierpuppe—a beautiful little Pom with long quilled petals. Colour a true salmon. 1/0

Hydrangeas

NEW HYBRIDS — From 3/6 each.

(Subject to being unsold).

Older varieties, 2/6, 3/6, 5/0, 7/6, according to size of plant.

These grand subjects are becoming increasingly popular in South Africa. Their culture is of the easiest; their wonderful lasting qualities as a cut flower and on the bush, as well as their great beauty, capture and hold the regard of all flower lovers.

PLANTING.

Hydrangeas thrive best under light shade in a moist situation. The soil should be thoroughly trenched to a depth of two to three spits before planting. A liberal dressing of stable or farmyard manure together with $\frac{1}{2}$ lb. bonemeal per sq. yard, should be well mixed with the top spit. Do not apply lime unless pink shades are required. Under adverse conditions it is better to grow these plants in pots, drums or tubs — they make ideal steep plants when grown in shade.

POTTING.

Hydrangea plants respond well to a good dressing of coarse bone meal forked into the top soil during winter, and the following potting soil is ideal: two parts finely broken up peat (procurable from most nurserymen) two parts leaf mould, one part good garden loam, half part sand, thoroughly mixed together and to every barrow load add one five inch pot full of coarse bone meal. They are water loving plants and like plenty of drainage — keep moderately moist after potting, giving more and more water as plants grow, requiring daily soakings when in full bloom. It is advisable to give plants two or three dustings of flowers of sulphur when in strong growth before the blooms show colour. This should be done on a warm still morning and will prevent attacks of mildew.

PRUNING.

When plants have finished flowering cut out all thin shoots leaving only the strongest for next season's flowering — these should be tipped back. In the case of shoots that have flowered, healthy, undeveloped buds may be left at the end of the season's growth.

BLUEING.

Hydrangeas are very variable as regards colour. Blue varieties may turn pink where soils lack sufficient iron or alumina. Pink varieties may turn blue, or partly blue, where there is an excess of these chemicals, probably in compound form. It is possible to turn most pinks blue by adding one or another of these chemicals. To turn blues pink add agricultural lime to the soil. We market a "blueing compound" which can be obtained from us.

This compound dissolves readily in water and should be used at the rate of 3 ozs. per gallon. Commence application when growth begins in August and continue every two weeks until buds show colour. Be sure that the soil is moist before applying to the plants. White varieties will not respond and the red types will result in an unpleasing colour; but the pinks, especially those with a tendency to blue, will yield the most intense blues.

America (new).—A strong grower bearing large trusses of a beautiful rose-pink shading almost to white at the edges of the rounded pips. **3/6**

Ami Pasquier.—A beautiful bright red variety with small to medium pips forming excellent heads. Dark foliage and stem. **3/6**

Apollo (new).—One of the most outstanding of the new reds, being a brilliant ruby colour. Pips large and shapely. **3/6**

Baroness Schroeder.—A grand variety, large truss and pips very sturdy habit; delicate flesh-pink, toning to slaty-mauve in some soils.

Blue Prince.—A strong vigorous grower; medium-size flower trusses; a beautiful deep blue.

HYDRANGEA BLUEING COMPOUND.

To all interested in Hydrangeas we can highly recommend this chemical which, if rightly applied, will enable anyone to obtain the most intense Blues and Purples from standard Blue varieties.

Plants must be well established before application at the rate of 3 ozs. per gallon water (1lb. per 5 gallons) is commenced. Apply every two weeks after buds form and continue until colour shows. If more intense colour is required continue application. Apply as you would liquid manure.

Price f.o.r. Wynberg Station.

5 lbs. 3/6, 10 lbs. 6/-.

Larger quantities on application.

SPECIAL OFFER OF HYDRANGEAS.

1 Dozen named Hydrangeas taken from the varieties NOT marked **3/6.**

At least **8** distinct varieties included, **£1 0 0.**

Strong Plants in tins f.o.r. Wynberg Station.

Daphne (new).—A large truss composed of well-formed pips medium to large in size. Colour a clear brilliant red. 3/6

Amsterdam—An excellent variety with a large truss and pip. Colour deep mauve shading to mauve pink.

Donotoi.—A double-flowered variety, pink to mauve and blue. Quite a novelty.

Elbe—Beautiful bright blue shade. Medium to large pips. Dwarf habit. From 3/6

Elmar—This variety grows into a rather short bush; bears large trusses of bloom of a brilliant carmine-red colour.

Europe (new).—Massive blooms with exceptionally large pips. One of the most outstanding of the rose-pinks. Colour a beautiful dark rose. 3/6

F. Mathes—a tall vigorous variety; large pips and trusses; colour exquisite salmon-rose.

Gertrude Glahn—Large pip and truss exceptionally beautiful pink, shading later to a rich lilac-blue.

Goliath (blue).—A gorgeous variety well named; pip and truss both large; stems long; a wonderful blue shot mauve colour.

Gartenbaudirekteur Kunnert—Large pip and truss. Lower section of pip pointed. Strong grower. Colour deep blue. New variety. 3/6

Hamburg—Enormous pips and heads. Strong grower of medium height. Colour rose pink shading to mauve. New variety. 3/6

Henrich Seidel.—Large rounded pips forming large trusses of a beautiful deep ruby-red are the chief characteristics of this excellent variety.

Holstein—Beautiful heads composed of medium sized pips. Colour usually mauvy blue. 3/6

King George.—One of the best; pip large with fimbriated edge. Most variable. Sometimes deep blue, sometimes rosy-mauve.

La France—An excellent blue variety with medium to large pips. Colour variation usually from light to dark blue. 3/6

La Lorraine—An exquisite pale rose variety; large trusses.

La Marne—An exquisite variety bearing large trusses composed of large pips of a soft mauve colouring; vigorous grower.

Madam Baardse.—Medium pips and truss. Colour a beautiful shade of rose-red. 3/6

Madam Cayeaux—Medium sized pips form excellent heads. Colour pinky red. Unique. Medium height and a strong grower. 3/6

Mad. E. Mouillere—A beautiful fine white with a carmine centre; strong grower; enormous pips and heads, tones to pale blue as bloom ages.

Mad. Riverain—a beautiful light blue; large truss; small pip.

Marechal Foch—A true novelty, rather variable; sometimes rose-pink shading to lovely shades of metallic blue flushed old rose; strong grower.

Miss Belgium (new).—Small to medium pips. Colour a beautiful shade of rose shading to red. 3/6

Mrs. Phyllis Cato.—A quite distinct variety; large pip and truss; very variable, being flesh-pink shaded amber in some soils or shaded violet and blue in others.

Munster (new).—Medium-large pips and truss. Colour a striking dark crimson. 3/6

Niege Orlenaie.—Ivory-white; one of the most beautiful hydrangeas; trusses large.

Otaksa Montrose—A very large rich mauve-pink; tall stems; strong grower and free bloomer.

Paris.—Large pip and truss. Colour rich blue shading to purple. An excellent variety. Colour sometimes a beautiful bright shade of blue. **3/6**

Parzival—A beautiful deep red variety; large truss; pips Primula-like in shape; very free blooming; dwarf grower.

President Doumergue—A most beautiful red variety. Pips and heads of medium size. Striking appearance. **3/6**

Schadendorff's Perle (new).—Medium to large pips and truss of a beautiful rosy-salmon shade with darker veins. An excellent variety and a vigorous grower. **3/6**

Vesuvius—A new red variety of striking colour — one of the deepest shades yet produced. Strong grower. **3/6**

N.B.—Most of the red varieties are fairly dwarf in habit and should be placed in front of the taller blues, pinks and whites.

STRONG PLANTS IN TINS F.O.R. WYNBERG, C.P.

BARBERTON DAISIES.

Jamesonii—The ordinary red Barberton Daisy. A strong grower and profuse bloomer. Beautiful brick red flowers excellent for cutting. **3/6 per dozen.**

WATER LILIES.

THESE BEAUTIFUL PLANTS SHOULD BE IN EVERY POND!

Pale Pink	3/6 per plant.
Yellow	3/6 per plant.
Red	5/- per plant.
Double White	5/- per plant.
Deep Pink	5/- per plant.
Deep Maroon	5/- per plant.

SEEDLINGS.

We will be pleased to send a list of the seedlings that we have on hand in season upon application by any customer. Such subjects as Iceland Poppies, large-flowered Pansies, perennial Lupins, hybrid Delphiniums, etc., can be obtained from us from time to time.

Various Irises

IRIS SIBERICA.

An exquisite little Iris reaching from one to two feet in height, bearing **dainty** blooms on long, slender, wiry stems. Thrives best in wet situations.

Orientalis.—Deep blue; tall.

Purple King.—A glorious rich shade of deep purple; tall.

9d. each. 5/0 per dozen.

Rhizomes ready for planting from June to August.

IRIS OCHROLEUCA.

This Iris makes a handsome plant of 3 ft. in height, with 5 ft. spikes. The leaves are long, stiff,

and of a dark green colour. The fine blooms resemble large, cream, shaded yellow, Spanish Iris blooms, and are borne in profusion on both sides of the stems. Thrives in any soil. A handsome border plant.

Plants 1/6 each; 12/0 per dozen.

Plant from February to May.

Iris Monnieri—A pure yellow iris identical in shape to Iris Ochroleuca. Similar habit and cultivation to Iris Ochroleuca. 2/6 each.

IRIS STYLOSA (the Algerian Iris).

This charming winter-flowering Iris thrives in any position; the exquisite lavender-blue blooms reach 12 inches in height.

Plant from February to May.

9d. each; 5/0 per dozen.

Iris Germanica

The bearded or Flag Iris are now obtainable in a wonderful range of colourings. It is of tall, robust growth, and thrives well in **any** soil, if given a fairly **dry**, well-drained position. Plenty of lime should be incorporated into the beds before planting. All varieties are perfectly hardy and very free-blooming. They are most decorative for both house and garden, lasting well as a cut flower.

Priced individually.

Plant from March to August.

Edward Michael.—Deep, distinct wine-red, tall spikes, medium bloom. 2/6 each.

Emperor.—A grand purple, in bloom practically all the year round. 1/0 each.

Pallida Odorotissima.—Charming tall truss, intense blue; medium blooms. 1/- each.

Pallida Dalmatica (Princess Beatrice).—Very large, tall pale lavender blue, the best in this colour. 2/0 each.

Queen of May.—The most charming of the Pink Pallidas. 2/6 each.

Sheffield Chieftain.—Very tall-growing, with branching flower stems of a pale blue colouring. 1/0 each.

N.B.—The above planting times are approximate.

Cannas

For producing brilliant colour effects in the garden, the Canna is unsurpassed. Its culture is of the easiest, and this coupled with its wonderful freedom of bloom, makes it one of the most popular subjects for garden decoration.

The range of colour is a large one, comprising many shades of pink, orange, scarlet, crimson and yellow. It blooms for the major part of the year; in fact, in districts free from frosts, practically throughout the year.

Named Varieties: 1/0 each; 7/6 per dozen.

(Except where individually priced.)

Plant all the year.

Antoine Wintner.—Deep yellow blooms. Plants of medium height. 1/6 each.

Beauty of Ohio.—Flaming scarlet with a centre spotted orange flushed gold. Height 4 feet.

Bridesmaid.—A delicate pale rose edged and flushed gold to the centre. Dark foliage. Height 4 to 5 feet.

Cupid.—Dwarf habit. Medium sized pips. Colour delicate apple pink. Height 3 to 4 feet.

Danton.—A beautiful variety, small-flowered, brilliant orange scarlet liberally edged gold. Height 4 to 5 ft.

Dr. Eckner.—Salmon-pink: very large pip and truss; green foliage. Height 4 to 5 feet. 1/6 each.

Duke of York.—Rosy-pink edged cream. Foliage bright green; exquisite variety. Height 4 ft.

Druid Hill.—Large pips and head. Tall grower with dark foliage. Colour striking crimson.

Edward Mieg.—Rich scarlet-crimson. Foliage green. Does not burn under the hottest sun. Height 5 to 6 ft.

Fiery Cross.—Vivid scarlet shaded crimson; enormous blooms. Green foliage. One of the best. Height 5 ft.

Goldbird.—Large pale yellow pips. Heavy heads. Medium height. 1/6 each.

Graf Waldersee.—Very large pips and a heavy head. Colour orange scarlet overlaid gold. Dark foliage. Pips have a crinkled edge. 5 to 6 feet.

J. D. Cabos.—Deep apricot, large blooms. Foliage brown with metallic shading. A grand variety. Height 5 to 6 ft.

King Midas.—Beautiful deep yellow pips. Short to medium growth. Green foliage. Striking plant. 1/6 each.

Louisiana.—Large pips of a deep orange scarlet. Large head and tall grower. Green foliage. Height 5 to 6 feet.

Tangerine.—A beautiful orange spotted gold at centre, large petals edged gold. Height 5 ft.

The President.—One of the largest of all Cannas. Huge heads are carried on sturdy stems. Colour a brilliant scarlet. Height 4 to 4½ feet.

Salmon King.—Large head. Colour a beautiful clear salmon-pink. Height 4 to 4½ ft.

Victoire.—A large flowered salmon pink flushed deep pink canna; one of the most beautiful. Height 3 feet. 1/6 each.

Waybash.—Large bright cerise pink pips with a background of coppery red foliage. One of the best. 1/6 each.

W. Watson.—Large apricot pips shot scarlet with crinkled edge. Tall growth. Dark foliage.

Yellow Queen.—Pale creamy yellow; small flowered; green foliage. Height 4½ ft.

Herbaceous and Other Plants

Tuberoses.

These delightful, fragrant bulbs are most effective when planted in the herbaceous border amongst other bulbs of brilliant colourings; or planted in a bed by themselves, bordered by green grass, they are lovely. Grown in tubs they thrive excellently — therefore no one need be debarred from enjoying their rich fragrance or exquisite beauty. The blooms last for weeks on the plants. Plant as soon as all risk of frost is past.

Bulbs from August to October.

Excelsior Pearl.—Large, double-flowered variety. The beautiful wax-like blooms are carried on graceful stems, 2½ ft. long. 2/6 dozen; 15/0 per 100.

NATIVE GLADIOLI.

Gladiolus Psittacinus.—A gorgeous very tall-flowering native gladiolus of a brilliant orange-scarlet colouring blotched yellow at base of throat. Flowering spikes reach 4½ ft. in height, are branching, and the main stem bears from 18 to 20 blooms of which 12 are often open at one time. Blooms during late April and May. The most striking of all native gladioli.

2/0 per dozen; 12/0 per 100.

MICHAELMAS DAISY.

Climax.—Tall-growing variety of a pale blue shade. Large individual flowers. Plants grow easily and bloom profusely. Height 4 to 5 ft. 3/6 dozen.

Violets

This fragrant and popular subject should find a place in every garden, big or small. It is ideal for bordering paths or beds, and excellent for growing on shaded banks.

Prince of Wales—Large-flowered, dark purple variety, 1/0 per dozen, 6/0 per 100.

Solidago — Golden Rod.

This grand perennial should be in every garden, its culture being of the easiest. It thrives in any soil or position, and makes an attractive addition to the herbaceous border planted near the back.

Golden Wings.—This variety reaches 5 to 6 ft. in height, colour a glowing, golden yellow. Sprays are branching and most graceful. 9d. each; 5/0 per dozen.

Plant from May to September.

Shasta Daisy Imperial.

The largest of all Shastas, blooms measuring up to seven inches across. Excellent for borders or massed in beds. Height 3 ft. 2/6 per dozen.

Plant from May to September.

THE LAND RAIN.

Best adapted for Lawns of average size. This beautiful sprayer consists of a 15 ft. length of pipe with eight clusters — consisting of seven silver stream nipples — so arranged along the pipe that when in action the jets of water are spread out like a peacock's tail. It waters a rectangle of 18 ft. by 50 ft.

7 ft.	10 ft.	12 ft.	15 ft.
£2 4s. 0d.	£2 11s. 6d.	£2 19s. 0d.	£3 12s. 0d.

Watering made Easy

By

**FIXED or PORTABLE
Sprayer Systems**

These appliances will work on 20 lb. pressure, but 30 lb. (the usual city pressure) is ideal for them. The fixed plants or larger sprayers can be pump-driven if water is drawn from a well.

THE RAINBOW.

This magnificent sprayer waters a large rectangle of 50 ft. by 50 ft. — 2,500 sq. ft., yet its length over all is only 4 ft., and its weight only 8 lbs. This sprayer operates best on large greens and big lawns. Its beautiful and spectacular appearance coupled with its remarkable efficiency speaks for itself. Price: £2 17s. 6d.

CANNON MISTO ADJUSTABLE
NOZZLES FOR HOSE ENDS,

5/- each.

N.B.—When ordering, specify size
of hose.

All prices F.O.R. Wynberg Station.

WE CAN CATER FOR INDIVIDUAL
REQUIREMENTS. SPRAYERS CAN BE
MADE FROM ANY LENGTH, AND
SPECIAL TYPES CAN BE MANUFAC-
TURED IF SPECIFICATIONS ARE
GIVEN. LET US SOLVE YOUR
WATERING PROBLEMS.

Border Rain (Mist Nipples).

The BORDER RAIN.

This sprayer, made in lengths of 12 ft. and 15 ft., is primarily used for watering in one direction only. It can be rotated on its stands so that it waters the opposite way as well, but not at one and the same time. Three types of nipples may be used:— Stream jets, which water as far away as 25 ft.; 80° Mists, which water about 13 feet (this is the type most generally used); and Catfish, a more expensive nipple, which waters about 7 ft., but about four times as quickly as the others.

Prices:

8 ft.: £1 10s. 0d.	10 ft.: £1 15s. 0d.
12 ft.: £1 17s. 6d.	15 ft.: £2 0s. 0d.

(Catfish 5/- extra — 2/6 on 8 and 10 ft.)

This sprayer is very popular, and many are in use throughout the country. Owing to the fact that it throws only one way, and that it can be rotated in its stands, it can be used either for a border or for a large lawn.
